REVIEW OF OPERATING RESULTS

The year under review was the most difficult period owing to the poor economic situation in the country. Rising Inflation, increasing KIBOR rate, continuous devaluation of the Rupee, and unprecedented shortages of power and gas, has considerably increased the cost of doing business. In these circumstances the management of your Company has had to take very stringent measures to keep the operations as smooth as possible by controlling the costs and increasing the efficiencies wherever possible.

In the Chairman's review last year it was stated that EMCO had made arrangements to install a synthetic natural gas (SNG) plant as a substitute for natural gas. However, the financial viability of the plant was based on the average number of days of gas load shedding prevailing in the previous year. In the period under review, the frequency as well as the duration of gas shutdowns forced us to shut down the plant as it was not financially viable to run the plant on SNG.

The new Tile plant which was commissioned in January 2009 had produced very encouraging results which are seen from the financial performance of this plant.

Despite the circumstances described above the company has reduced the loss before tax to Rs. 76 Million as compared to a loss of 103 Million in the previous year. After adjusting all the deferred tax and the current year tax, the after tax loss is Rs. 71.745 million as compared to Rs. 81.219 million in the previous year.

The net sales of the company increased from Rs. 1542.108 million to Rs. 1860.987 million showing increase of approximately 21%. Despite the pressure on the costs the gross profit margin and profit from operations remained at 16.4% and 5.3% respectively, which are the same as last year.

Plant wise performance is given below.

INSULATOR PLANT

In view of the high inventory carried over from the previous year, we chose to lower production levels in the current year. The overall production in this plant was 4049 tons as compared to 4657 tons for the previous year. One of the tunnel kilns was shut down in November 2009 and was subsequently restarted in March 2010. The Insulator division increased sales of Rs. 739 Million as compared to 666 million last year, has shown operating loss of Rs. 2.145 Million as compared to operating loss of Rs. 19.814 Million in the previous year.

There has been an increase in the orders from the domestic utilities and this division is expected to have a gross production of approximately 5000 tons this year. The export market has continued to perform well and it is anticipated that more than 25% of the production may be exported. In addition to the existing export market, Turkey has been added as the new potential market for newer product.

WALL TILE

With the new plant in full operation, the total annual production increased to 2.96 million sq. m from 2.41 million sq. m, which converts towards 23% increase. However, this plant suffered a number of shutdowns / slowdowns owing to lack of gas. The months of January and February saw an extreme reduction in the availability of gas and the plant was run at less than 10% of its capacity. Sales for this division remained robust. The total sale for the current year is Rs. 871 Million as compared to Rs. 685 Million last year which is 27% increase. This higher sale has resulted in a net profit of Rs. 20.8 Million as compared to a profit of 8.2 million in the previous year. It is expected that if the gas is available through the year with scheduled load shedding the plant, Insha Allah will show better results.

FLOOR TILE

The Floor tile plant was very severely affected owing to lack of gas as described above. However, with better management the production has increased to 0.8 million as compared to 0.7 million last year whereas the sales have also increased to Rs. 252 million as compared to Rs. 191 million last year showing an increase of 31%. However, owing to the higher cost the Floor tile has shown a net loss of 20.123 million as compared to net loss of 51.682 million in the previous year. It is anticipated that in the new year the over all production is liable to increase owing to better planning.

The company's contribution to the exchequer in the year under review is Rs. 340.068 million in the shape of import duty, sales tax, income tax and other government levies.

CODE OF CORPORATE GOVERNANCE

The requirements of the Code of Corporate Governance set out by the Karachi, Lahore, and Islamabad Stock Exchange in their Listing Regulations, relevant for the year ended June 30, 2010 have been adopted by the Company and have been duly complied with. A statement to this effect is annexed with the report.

In compliance with the provisions of the Code, the Board members are pleased to place the following statement on record:

- The financial statements for the year ended June 30, 2010 present fairly its state of affairs, the results of its operations, cash flow and changes in equity;

The AC holds its meeting prior to the Board meeting. A total of four meetings of Audit Committee were held during the year under review. It includes statutory meeting with external auditors before start of annual audit and meeting with external auditors without CFO and head of internal audit being present. Name of the members of Audit Committee are as follows:

1.	Mr. Usman Haq	Chairman
2.	Mr. Tariq Rehman	Member
3.	Mr. Suhail Mannan	Member
4.	Mr. Tahir Rehman	Member
5.	Mr. Javaid S. Siddiqi	Member

EMPLOYEES RELATIONS

Despite the very inflationary pressure the management would like to place on record a very positive and cooperative role of employees during the year. The management would like to place on record its appreciation in this regard and will look forward to their continuous support during this difficult time which the whole country is subjected to. The management would also like to place on record the very cooperative role played by the Union in increasing the output on virtually each stage of production and reduce loss.

FUTURE OUTLOOK

Despite the future economic down turn the management is optimistic and will strive to produce better results for its stakeholders. The company has made its future plans based on the existing gas load shedding and with the active participation of its engineering cadre to bring about better efficiencies and ultimately a better result. We should all today pray together for a better Pakistan.

ACKNOWLEDGEMENT

We would like to thank our valued customers, dealers and especially the banks which have shown not only cooperation but patience in some payments which were delayed over which the management has no control and finally we would like to thank our shareholders for their unwavering support.

DIVIDEND

Considering the brought forward losses, no dividend is recommended for the year ended June 30, 2010.

REVIEW REPORT TO THE MEMBERS ON STATEMENT OF COMPLIANCE WITH BEST PRACTICES OF CODE OF CORPORATE GOVERNANCE

We have reviewed the Statement of Compliance with the best practices contained in the Code of Corporate Governance prepared by the Board of Directors of Emco Industries Limited to comply with the Listing Regulation No. 37 of the Karachi Stock Exchange, Chapter XIII of the Lahore Stock Exchange and Chapter XI of the Islamabad Stock Exchange where the company is listed.

The responsibility for compliance with the Code of Corporate Governance is that of the Board of Directors of the company. Our responsibility is to review, to the extent where such compliance can be objectively verified, whether the Statement of Compliance reflects the status of the company's compliance with the provision of the Code of Corporate Governance and report if it does not. A review is limited primarily to inquiries of the company personnel and review of various documents prepared by the company to comply with the Code.

As part of our audit of financial statements we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We are not required to consider whether the Board's statement on internal control covers all risks and controls, or to form an opinion on the effectiveness of such internal controls, the company's corporate governance procedures and risks.

Further, sub-regulation (xiii) of Listing Regulations 37 notified by the Karachi Stock Exchange (Guarantee) Limited vide circular KSE/N-269 dated January 19, 2009 requires the company to place before the board of directors for their consideration and approval related party transactions distinguishing between transactions carried out on terms equivalent to those that prevail in arm's length transactions and transactions which are not executed at arm's length price recording proper justification for using such alternate pricing mechanism. Further, all such transactions are also required to be separately placed before the audit committee. We are only required and have ensured compliance of requirement to the extent of approval of related party transactions by the board of directors and placement of such transactions before the audit committee. We have not carried out any procedures to determine whether the related party transactions were undertaken at arm's price or not.

Based on our review nothing has come to our attention, which causes us to believe that the Statement of Compliance does not appropriately reflect the company's compliance, in all material respects, with the best practices contained in the Code of Corporate Governance as applicable to the company for the year ended June 30, 2010.

AUDITORS' REPORT TO THE MEMBERS

We have audited the annexed balance sheet of EMCO Industries Limited as at June 30, 2010 and the related profit and loss account, statement of comprehensive statement, cash flow statement and statement of changes in equity together with the notes forming part thereof, for the year then ended and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit.

It is the responsibility of the company's management to establish and maintain a system of internal control, and prepare and present the above said statements in conformity with the approved accounting standards and the requirements of the Companies Ordinance, 1984. Our responsibility is to express an opinion on these statements based on our audit.

We conduct our audit in accordance with the auditing standards as applicable in Pakistan. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the above said statements are free of any material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the above said statements.

An audit also includes assessing the accounting policies and significant estimates made by management, as well as, evaluating the overall presentation of the above said statements. We believe that our audit provides a reasonable basis for our opinion and, after due verification, we report that:

- (a) In our opinion, proper books of account have been kept by the company as required by the Companies Ordinance, 1984;
- (b) In our opinion:
 - (i) the balance sheet and profit and loss account together with the notes thereon have been drawn up in conformity with the Companies Ordinance, 1984, and are in agreement with the books of account and are further in accordance with accounting policies consistently applied except for the change in accounting policy referred to in note 2.3.1 with which we concur;
 - (ii) the expenditure incurred during the year was for the purpose of the company's business; and
 - (iii) the business conducted, investments made and the expenditure incurred during the year were in accordance with the objects of the company;
- (c) in our opinion and to the best of our information and according to the explanations given to us, the balance sheet, profit and loss account, statement of comprehensive income, cash flow statement and statement of changes in equity together with the notes forming part thereof conform with approved accounting standards as applicable in Pakistan, and, give the information required by the Companies Ordinance, 1984, in the manner so required and respectively give a true and fair view of the state of the company's affairs as at June 30, 2010 and of the loss, total comprehensive loss, cash flows and changes in equity for the year then ended; and
- (d) in our opinion no zakat was deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980).

Without qualifying our opinion, we draw attention to note 2.2 to the financial statements which states that the continuation of the company as a going concern is dependant on its ability to attain satisfactory level of profitability in future and in the intervening period, continued support from sponsors. Management's plan in regard to this matter has been discussed in note 2.2 to the financial statements.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2010

1. LEGAL STATUS AND NATURE OF BUSINESS

The company is incorporated in Pakistan and listed on Karachi, Lahore and Islamabad Stock Exchanges. The company was incorporated as a Joint Stock Company in Pakistan under the Companies Act, 1913, (now Companies Ordinance 1984) as a private limited company on August 17, 1954 by the name of Electric Equipment Manufacturing Company (Private) Limited. Later it was converted into a public company on August 20, 1983 and its name was changed to EMCO Industries Limited on September 12, 1983. The company was listed on the stock exchange on December 29, 1983. Its registered and head offices are situated at 119-E/1, Hali Road, Gulberg III, Lahore.

The company is principally engaged in manufacture and sale of high/low tension electrical porcelain insulators, switchgear and ceramic tiles.

2. BASIS OF PREPARATION

2.1 *These financial statements have been prepared in accordance with approved accounting standards as applicable in Pakistan and the requirements of Companies Ordinance, 1984. Approved accounting standards comprise such International Accounting Standards as notified under the provisions of Companies Ordinance, 1984. Wherever, the requirements of the Companies Ordinance, 1984 or directives issued by the Securities and Exchange Commission of Pakistan (SECP) differ with the requirements of these standards, the requirements of Companies Ordinance, 1984 or the requirements of the said directives take precedence.*

2.2 *The Company has incurred a loss after taxation of Rs 71.745 million during the year ended June 30, 2010 while the accumulated loss stands at Rs 416.267 million as at June 30, 2010. Current liabilities exceed current assets by Rs 268.075 million and the existing borrowing facilities are fully utilized. The company, in order to carry on its business without material curtailment of operations and to meet its current obligations requires improvement in operating margins and increase in sale volumes through increased production quantities which is dependent on availability of uninterrupted gas supply. Continuation of the company as a going concern is dependent on its ability to attain satisfactory level of profitability in future and in the intervening period, continued support from sponsors.*

The management of the company is confident that it will be able to meet its obligations and carry on business without any curtailment based on the grounds that the company will be able to achieve satisfactory level of profitability in the future based on the plans drawn up by the management for this purpose, which include continued support from sponsors and increased profitability through higher sale volumes and improved operating margins.

This financial information consequently does not include any adjustments relating to the realization of its assets and liquidation of any liabilities that might be necessary should the company be unable to continue as a going concern.

2.3 Standards, Interpretations and amendments to published approved accounting standards

2.3.1 Amendments to published standards effective in current year

- IAS 1 (Revised), 'Presentation of financial statements' is effective from January 1, 2009. The revised standard will prohibit the presentation of items of income and expenses (that is, 'non-owner changes in equity') in the statement of changes in equity, requiring 'non-owner changes in equity' to be presented separately from owner changes in equity. All non-owner changes in equity will be required to be shown in performance statement, but company can choose whether to present one performance statement (the statement of comprehensive income) or two statements (the income statement and statement of comprehensive income).

The company has preferred to present two statements; a profit and loss account (income statement) and a second statement beginning with profit or loss and display components of other comprehensive income (statement of comprehensive income).

- Certain amendments to IAS 23 'Borrowing Costs' have been published that are applicable to the company's financial statements covering annual periods, beginning on or after January 1, 2009. Adoption of these amendments would require the company to capitalize the borrowing cost directly attributable to acquisition, construction or production of a qualifying asset (one that take substantial period of time to get ready for use or sale) as part of the cost of that asset. The option of immediately expensing these borrowing costs will be removed. Its adoption will not have any impact on the company's financial statements.

- IFRS 8, 'Operating Segments' replaces IAS 14 and is effective from January 01, 2009. IFRS 8 provides guidance for disclosure of information about entity's operating segments, products and services, geographical areas in which it operates, and major customers. Its adoption requires some additional disclosures but does not have any impact on the financial position of the company.

2.3.2 Amendments and interpretations to published standards applicable to the company not yet effective

The following amendments and interpretations to existing standards have been published and are mandatory for the company's accounting periods beginning on or after their respective effective dates:

- IAS 1 (amendment), 'Presentation of financial statements'. The amendment is part of the IASB's annual improvements project published in April 2009. The amendment provides clarification that the potential settlement of a liability by the issue of equity is not relevant to its classification as current or non-current. By amending the definition of current liability, the amendment permits a liability to be classified as non-current (provided that the entity has an unconditional right to defer settlement by transfer of cash or other assets for at least 12 months after the accounting period) notwithstanding the fact that the entity could be required by the counterparty to settle in shares at any time. It is not expected to have a material impact on the company's financial statements.

- IAS 38 (amendment), 'Intangible assets'. The amendment is part of the IASB's annual improvements project published in April 2009. The amendment clarifies guidance in measuring the fair value of an intangible asset acquired in a business combination and it permits the grouping of intangible assets as a single asset if each asset has similar useful economic lives. The amendment will not result in any significant impact on the company's financial statements.

2.3.3 Standards and interpretations to existing standards that are not applicable to the company and not yet effective

The other new standards, amendments and interpretations that are mandatory for accounting periods beginning on or after July 1, 2009 are considered not to be relevant or to have any significant impact on the company's financial reporting and operations.

3. BASIS OF MEASUREMENT

These financial statements have been prepared on the historical cost convention, except for certain items of property, plant and equipment which have been carried at revalued amount as stated in note 4.3 and measurement of certain financial instruments at fair value and recognition of certain employee retirement benefits at present value.

The company's significant accounting policies are stated in note 4. Not all of these significant policies require the management to make difficult, subjective or complex judgments or estimates. The following is intended to provide an understanding of the policies the management considers critical because of their complexity, judgment of estimation involved in their application and their impact on these financial statements. Estimates and judgments are continually evaluated and are based on historical experience, including expectation of future events that are believed to be reasonable under the circumstances. These judgments involve assumptions or estimates in respect of future events and the actual results may differ from these estimates. The areas involving higher degree of judgments or complexity or areas where assumptions and estimates are significant to the financial statements are as follows:

- (a) Provision for Taxation;
- (b) Employee retirement benefits and other obligations;
- (c) Accrued liabilities;
- (d) Useful life and residual values of property, plant and equipment;
- (e) Provision for doubtful debts; and
- (f) Provision for obsolete stock.

4. SIGNIFICANT ACCOUNTING POLICIES

4.1 Taxation

Current

Provision of current tax is based on the taxable income for the year determined in accordance with the prevailing law

for taxation of income. The charge for current tax is calculated using prevailing tax rates or tax rates expected to apply to the profit for the year if enacted. The charge for current tax also includes adjustments, where considered necessary, to provision for tax made in previous years arising from assessments framed during the year for such years.

Deferred

Deferred tax is accounted for using the balance sheet liability method in respect of all temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of the taxable profit. Deferred tax liabilities are recognized for all taxable temporary differences and deferred tax assets are generally recognized to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilized.

Deferred tax is calculated at the rates that are expected to apply to the year when the differences reverse based on tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax is charged or credited in the income statement, except in the case of items credited or charged to equity in which case it is included in equity.

4.2 Staff retirement benefits

4.2.1 The Company operates a defined contributory provident fund for all its permanent workmen employees. Equal monthly contributions are made by the company and employees to the fund.

4.2.2 The company operates an unfunded gratuity scheme for the non-workmen employees who are not covered under the provident fund scheme. The unfunded gratuity scheme is a defined benefit final salary plan. Actuarial Valuations are conducted every year to determine the defined benefit liability and current service cost under the scheme.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions in excess of the greater of 10% of the fair value of plan assets or 10% of the present value of defined benefit obligation are charged or credited to income over the employees' expected average remaining working lives of the employees participating in the plan.

Retirement benefits are payable to staff on resignation, retirement or termination from service, subject to completion of prescribed qualifying period of service under these schemes.

4.3 Property, plant and equipment

Property, plant and equipment except freehold land, buildings thereon and plant and machinery are stated at cost less accumulated depreciation and any identified impairment loss. Freehold land is stated at revalued amount less any subsequent accumulated impairment losses. Buildings on freehold land and plant and machinery are stated at revalued amounts less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Additions subsequent to revaluation are stated at cost less accumulated depreciation and any identified impairment loss. Cost in relation to certain assets comprises historical cost and cost of borrowing during construction period in respect of loans taken for specific projects.

Depreciation on all property, plant and equipment except freehold land is charged to profit on straight line method with the exception of tools and equipment, furniture and fixture, office equipment and vehicles which are charged to profit on diminishing balance method so as to write off the cost or revalued amount of an asset over its estimated useful life. Depreciation on machinery spares, included in plant and machinery, is charged to profit on diminishing balance method so as to write off the cost over the estimated useful life. Depreciation is being charged at the rates given in note 19. Incremental depreciation representing the difference between actual depreciation based on revalued carrying amount of the asset and equivalent depreciation based on the original carrying amount of the asset is transferred from accumulated loss to surplus on revaluation of property, plant and equipment. All transfers to/from surplus on revaluation of property, plant and equipment are net of applicable deferred income taxes.

Depreciation on additions is charged from the month the assets are available for use while no depreciation is charged in the month in which the assets are disposed off.

The assets' residual values and estimated useful lives are reviewed, at each financial year end and adjusted if impact on depreciation is significant. The company's estimate of the residual value of its property, plant and equipment as at June 30, 2010 has not required any adjustment as its impact is considered insignificant.

The company assesses at each balance sheet date whether there is any indication that property, plant and equipment may be impaired. If such indication exists, the carrying amounts of such assets are reviewed to assess whether they are recorded in excess of their recoverable amount. Where carrying values exceed the respective recoverable amount, assets are written down to their recoverable amounts and the resulting impairment loss is recognized in

income currently. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Where an impairment loss is recognized, the depreciation charge is adjusted in the future periods to allocate the asset's revised carrying amount over its estimated useful life. Impairment loss or its reversal, if any, is also charged to profit. Where an impairment loss is recognized, the depreciation charge is adjusted in the future periods to allocate the assets revised carrying amount over its estimated useful life.

Subsequent costs are included in the asset's carrying or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. All other repair and maintenance costs are charged to income during the period in which they are incurred.

The gain or loss on disposal or retirement of an asset represented by the difference between the sale proceeds and the carrying amount of the asset is recognized as an income or expense.

4.4 Capital work in progress

Capital work in progress is stated at cost less any identified impairment loss.

4.5 Intangible assets

Intangible assets are stated at cost less accumulated amortization and any identified impairment loss. Intangible assets are amortized using diminishing balance method so as to write off the cost over the estimated useful life. Amortisation is being charged at the rate given in note 21.

Amortisation on additions to intangible assets is charged from the month in which an asset is acquired or capitalised while no amortization is charged for the month in which the asset is disposed off.

The company assesses at each balance sheet date whether there is any indication that intangible may be impaired. If such indication exists, the carrying amount of such assets is reviewed to assess whether they are recorded in excess of their recoverable amount. Where carrying values exceed the respective recoverable amount, assets are written down to their recoverable amounts and the resulting impairment loss is recognized in profit and loss account for the year. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Where an impairment loss is recognized, the amortization charge is adjusted in the future periods to allocate the asset's revised carrying amount over its estimated useful life.

4.6 Leases

The company is the lessee:

Finance leases

Leases where the company has substantially all the risks and rewards of ownership are classified as finance leases. Assets subject to finance lease are initially recognized at the lower of present value of minimum lease payments under the lease agreements and the fair value of the assets. Subsequently, these assets are stated at cost less accumulated depreciation and any identified impairment loss.

The related rental obligations, net of finance charges, are included in liabilities against assets subject to finance lease as referred to in note 10. The liabilities are classified as current and non-current depending upon the timing of the payment.

Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the balance outstanding. The interest element of the rental is charged to profit over the lease term.

Assets acquired under a finance lease are depreciated over the useful life of the asset on diminishing balance method at the rates given in note 20. Depreciation on leased assets is charged to profit and loss account.

Depreciation on additions to leased assets is charged from the month in which an asset is acquired while no depreciation is charged for the month in which an asset is disposed off transferred.

Operating leases

Leases where significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit on a straight line basis over the lease term.

4.7 Stores, spares and loose tools

Usable stores and spares are valued principally at weighted average cost, while items considered obsolete are carried at nil value. Items in transit are valued at cost comprising invoice value plus other charges paid thereon.

Provision for obsolete and slow moving stores & spares is based on management estimate.

4.8 Stock-in-trade

Raw materials, packing material and components, except for those in transit, are valued at the lower of weighted average cost and net realizable value. Work-in-process and finished goods are valued at the lower of average cost and net realizable value. Work-in-process and finished goods comprises cost of direct materials, labour and appropriate manufacturing overheads. Cost of goods purchased for resale comprises the invoice value plus charges paid thereon.

Materials in transit are stated at cost comprising invoice values plus other charges paid thereon.

Net realizable value signifies the estimated selling price in the ordinary course of business less costs necessary to be incurred in order to make a sale.

Provision for obsolete and slow moving stock-in-trade is based on management estimate.

4.9 Financial instruments

Financial assets and financial liabilities are recognized when the company becomes a party to the contractual provisions of the instrument and derecognised when the company loses control of contractual contract that comprise the financial assets and incase of financial liabilities when the obligation specified in the contract is discharged, cancelled or expired. Any gain or loss on de-recognition of financial assets and financial liabilities is included in the profit and loss account for the year.

All financial assets and liabilities are initially measured at cost, which is the fair value of the consideration given and received respectively. These financial assets and liabilities are subsequently measured at fair value, amortized cost or cost, as the case may be. The particular measurement methods adopted are disclosed in the individual policy statements associated with each item.

4.10 Offsetting of financial assets and liabilities

Financial assets and liabilities are offset and net amount is reported in the financial statements only when there is legally enforceable right to set off the recognised amount and the company intends either to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

4.11 Trade debts

Trade debts are carried at original invoice amount less an estimate made for doubtful debts based on a review of all outstanding amounts at the year end. Bad debts are written off when identified.

4.12 Cash and cash equivalents

Cash and cash equivalents are carried in the balance sheet at cost. For the purpose of cash flow statement cash and cash equivalents comprise cash in hand, demand deposits, other short term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value and short term finances under mark-up arrangements, included in current liabilities in the balance sheet.

4.13 Borrowings

Loans and borrowings are initially recorded at the proceeds received. In subsequent periods, borrowings are stated at amortised cost using the effective yield method. Finance costs are accounted for on an accrual basis and are included in accrued mark-up on loans and other payables to the extent of the amount remaining unpaid.

4.14 Trade and other payables

Liabilities for trade and other amounts payable are measured at cost which is the fair value of the consideration to be paid in future for goods and services.

4.15 Provisions

Provisions are recognised when the company has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and reliable estimate of the amount can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

4.16 Foreign currencies

All monetary assets and liabilities in foreign currencies are translated into rupees at exchange rates prevailing at the balance sheet date. Transactions in foreign currencies are translated into rupees at the spot rate. All non-monetary items are translated into rupees at exchange rates prevailing on the date of transaction or on the date when fair values are determined.

The company charges all exchange differences to profit and loss account.

The financial statements are presented in Pak Rupees, which is the company's functional and presentation currency.

4.17 Revenue recognition

Revenue from sales is recognized on dispatch of goods to the customers.

4.18 Borrowing costs

Mark-up, interest and other charges on borrowings are capitalised up to the date of commissioning of the related property, plant and equipment acquired, out of the proceeds of such borrowings. All other mark-up, interest and other charges are charged to profit and loss account.

4.19 Business segments

The company is divided into three business segments:

- Insulator division - manufacture of high and low tension electrical porcelain insulators and switchgear;
- Wall tile division - manufacture of ceramic wall tiles; and
- Floor tile division - manufacture of ceramic floor tiles.

All these business segments are located in the same geographical area.

4.19.1 Segment assets and liabilities

The assets of a segment include all operating assets used by a segment and consists principally of operating cash, receivables, inventories and property, plant and equipment, net of allowances and provisions.

Segment liabilities include all operating liabilities consisting principally of deferred liabilities, other payables and accrued liabilities.

The carrying amounts of identifiable assets and liabilities are directly attributed to respective segments. The carrying amounts of jointly used assets and liabilities are allocated to the segments on the following basis:

Insulator	50%
WallTile	32%
FloorTile	18%

4.19.2 Allocation of segment expenses

All identifiable expenses are directly attributed to the respective segments. The jointly incurred expenses are allocated to the segments on the following basis.

Insulator	50%
WallTile	32%
FloorTile	18%

4.20 DIVIDEND DISTRIBUTION

Dividend distribution to the shareholders is recognised as a liability in the period in which it is approved by the shareholders.

43. Financial risk management

43.1 Financial risk factors

Overall risks arising from the company's financial assets and liabilities are limited. The company manages its exposure to financial risk in the following manner:

(a) Market risk

(i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk arises mainly from future commercial transactions or receivables that exist due to transactions in foreign currencies. The company's exposure to currency risk is as follows:

	2010 Rupees	2009 Rupees
Trade and other receivables - USD	<u>588,631</u>	<u>92,050</u>
Net exposure - USD	<u>588,631</u>	<u>92,050</u>

The following significant exchange rates were applied during the year:

Rupees per USD

Average rate	84.17	79.92
Reporting date rate	85.60	81.30

(ii) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. Significant interest rate risk exposures are primarily managed by a mix of borrowings at fixed and variable market rates and contracting floor and cap of these rates as referred to in note 9.2.

Fair value sensitivity analysis for fixed rate instruments

The company does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore, a change in interest rate at the balance sheet date would not affect profit or loss of the company.

Cash flow sensitivity analysis for variable rate instruments

If interest rates on long term loans from associates, banks and short term running finance, during the year, fluctuate by 1% higher / lower with all other variables held constant, profit after taxation for the year would have been Rs 6.831 million higher / lower, mainly as a result of higher / lower interest expense on floating rate borrowings.

(b) **Credit risk**

Credit risk represents the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk arises from deposits with banks, trade debts, loans and advances and other receivables.

(i) **Exposure to credit risk**

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows:

	2010 Rupees	2009 Rupees
Long term deposits	9,870,406	11,767,181
Long term loans	5,896,840	3,605,640
Trade debts	353,069,406	288,278,156
Loans, advances, deposits and other receivables	11,966,040	6,095,868
Cash and bank balances	49,994,464	57,764,051
	<hr/> 430,797,156 <hr/>	<hr/> 367,510,896 <hr/>

Credit risk represents the accounting loss that would be recognized at the reporting date if counter parties failed completely to perform as contracted. The risk on liquid funds is limited because counter parties are banks with reasonably high credit ratings. The company believes that it is not exposed to major concentration of credit risk. To manage exposure to credit risk, the company applies credit limits to its customers.

The age of financial assets and related impairment loss at balance sheet date is as follows:

	2010 Rupees	2009 Rupees
The age of financial assets		
Not past due	336,903,714	315,057,183
Past due but not Impaired:		
Not more than one year	62,348,694	31,846,445
More than one year and not more than three years	14,512,144	9,916,746
Over three years	1,672,969	1,381,960
Past due and Impaired:		
More than one years and not more than three years	1,050,243	299,162

	<hr/> 430,797,156 <hr/>	<hr/> 367,510,896 <hr/>

(ii) **Credit quality of major financial assets**

The credit quality of major financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rate:

Banks	Rating		Rating Agency	2010	2009

				<u>49,994,463</u>	<u>57,764,051</u>

Due to the company's long standing business relationships with these counterparties and after giving due consideration to their strong financial standing, management does not expect non-performance by these counter parties on their obligations to the company. Accordingly, the credit risk is minimal.

(c) **Liquidity risk**

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

Liquidity risk reflects an enterprise's inability in raising funds to meet commitments associated with the financial instruments. The company follows an effective cash management and planning policy to ensure availability of funds. The company also aims at maintaining flexibility in funding by keeping committed credit lines available.

The following are the contractual maturities of financial liabilities as at June 30, 2010:

43.4 Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders through repurchase of shares, issue new shares or sell assets to reduce debt.

Consistent with others in the industry and the requirements of the lenders the Company monitors the capital structure on the basis of gearing ratio. This ratio is calculated as borrowings divided by total capital employed. Borrowings represent long term loan obtained by the Company as referred to in note 9 & 10. Total capital employed includes equity as shown in the balance sheet plus borrowings. The gearing ratio as at year ended June 30, 2010 and June 30, 2009 are as follows:

		2010	2009
Borrowings	Rupees	469,984,546	499,438,056
Total capital employed	Rupees	533,616,500	617,979,245
Gearing ratio	Percentage	88%	81%

44. CAPACITY AND PRODUCTION	Capacity		Actual production
